CONCEPT OF THE PROGRAMME

Unlike other parts of the country the North East holds an important position from a strategic point of view as these states share their borders with other countries like Bangladesh, Bhutan, Myanmar and China. The terrain, the state of Socio economic development and historical factors such as language/ethnicity, tribal rivalry, migration, control over local resources and a widespread feeling of exploitation and alienation have resulted in a fragile security situation in the North Eastern States. This has resulted in violence and diverse demands by various Indian Insurgent Groups (IIGs).

Ministry of Home Affairs is taking all possible steps to address the genuine demands of various ethnic groups for development and for autonomy in managing their affairs. While the infrastructural developments like road, rail link, power supply water supply etc. are dealt with by Ministry of Development of North Eastern Region and various other line Ministries, the issues relating to strengthening of security, rehabilitation of people affected by militancy, bringing underground outfits to the main-stream through negotiations, confidence building measures etc. are looked after by the North East Division, MHA, Govt. of India. Diplomatic initiatives pertaining to security related issues with Bangladesh and Myanmar are also taken to strengthen the security situation there.

Because of above mention facts the youth who are residing in North Eastern States should be given opportunities to see the important places of the country to understand socio-economic development, life style, culture, skill development initiatives, entrepreneurship development, self employment opportunities and information on Flagship programmes of Govt. of India like Start up India, Stand up India, Digital India, Pradhan Mantri Jan Dhan Yojana and other Programmes of Social and Financial Inclusion. If the youth communities are getting sufficient information and opportunities to interact with their peer groups in other parts of the nation, the extremist activities in the area can be curtailed and pace of development in the region will be accelerated with the participation of North Eastern States youth population in Nation Development Process. Hence through this programme efforts are made for exposure visit to advanced cities of the North Eastern Youth for their positively engagement, education, awareness & exposure to development and advancement.
